Case Study:
Votiro Cloud + Microsoft 365

# International Football League

VOTIRO

Football League Needs Support to Bolster Their Security Stance

Internationally renowned football league had established email communication processes with distributed club teams. They wanted a way to ensure that no malicious threats, especially undisclosed or unrealized threats, could harm their organization through email files or attachments. Compromised systems could disclose highly confidential information and damage the league's overall reputation. Damaged systems could also halt business operations, resulting in lost revenue.

Preventing Threats in MS365 with Votiro Cloud

Votiro Cloud was deployed and integrated into their existing Microsoft Office 365 email platform. Immediately the solution went to work, disarming all new content and rebuilding it from known-safe components without sacrificing file functionality. With Votiro, the league could continue its business as usual without needing constant maintenance or monitoring. Votiro just worked, keeping their emails and attachments safe and preventing hidden threats from sneaking in via email.

✔ Simple and fast integration

✔ Eliminated known and unknown threats

✔ Seamless & invisible to users

Key Benefits

Votiro sanitizes all content without the need for detection, rebuilding only from known-safe components.

Integrity of content is maintained while all known and unknown threats are eliminated by default.

API-driven plug and play integration allows Votiro to work without changing existing infrastructure

About Votiro

Votiro is an award winning zero trust content security company serving hundreds of commercial and government organizations, worldwide. Votiro Cloud offers an open, API-centric Content Disarm and Reconstruction (CDR) solution to deliver safe content to your modern digital business processes and content-rich applications. Votiro eliminates file-borne threats targeting remote workers, supply chain collaborations, and B2C digital interactions.

Headquartered in the United States, with offices in Australia, Israel, and Singapore, Votiro is trusted by millions of users worldwide to receive billions of pieces of content with complete peace of mind. Votiro Cloud is SOC 2 Type II compliant solution and certified by the international standard of Common Criteria for Information Technology Security Evaluation (ISO/IEC 15408).
