

Votiro Cloud

Zero Trust Content Security

Can you trust the data and file content entering your organization? Votiro Cloud's Zero Trust open-API proactively disarms content of known, unknown, & zero-day malware threats at scale without adding friction, interrupting user or application workflows, or impacting file fidelity. Votiro reduces work, alerts, & risk for IT and security teams while enabling the seamless flow of safe files.

Secure Your Data Entering Data Lakes, Email Inboxes, and Content-Rich Applications

Votiro's Content Disarm and Reconstruction-as-a-Service technology, which includes open APIs for Email, Web Applications, and Web Browser, **sanitizes all malicious code and exploit threats from incoming files while preserving the integrity and functionality of the original file.** Votiro protects against 150+ weaponized file types including .ppt, docs, pdfs, and image files, all the way to more complex formats like zipped and password-protected files.

Unlike detection-based file security solutions that scan for suspicious elements and block *some* malicious files, Votiro singles out only the safe elements of each file, allowing through the known-good content. No more blocking, quarantining, or sandboxing needed!

Don't Let Security Slow Down Business

Data flows in. Let it go where it's needed - quickly *and* securely!

Secure Files, Content, and Data, No Matter The Source

Votiro Cloud for Email API

Easily connects with all mail servers, protecting all content and email attachments without delaying or disrupting business

Votiro Cloud for Web Browser API

Integrates into all existing proxy servers and secures any file downloaded from Chromium browsers

Votiro Cloud for Web Applications API

Protects against malicious files uploaded via company-specific web apps, portals, or other services used to receive customer files

✓ Easy implementation: 10-60 minutes

✓ Zero training required

✓ Seamless integration with existing solutions

✓ Supports both Cloud & On-Prem
