

# VOTIRO

## Zero Trust Data Detection and Response

Real-time Protection Against  
All Content-borne Threats

---

**Votiro is proactive data detection, threat prevention, and privacy and compliance rolled into one seamless platform.** With **Votiro**, organizations can stop known and unknown file-borne threats and mask and redact privacy risks in real-time, while also receiving in-depth threat analytics to better understand current risks - and future threats – without ever sacrificing functionality or productivity.

**Votiro protects major industries** across the globe, including:

- Shipping and Logistics
- Healthcare
- Financial Services
- Media Outlets
- Law Firms
- Insurance
- And More

Votiro Plugs the Gaps Left Behind by AV, DSPM, EDR, DLP, **and Prevents Zero-days**

Plus, with **Votiro**, you can safely download, upload, and share **180+ file types**.

# Data Security without Compromise

From uploads to endpoints, **data flows everywhere**. This makes visibility and mitigation nearly impossible for IT teams to keep up with. More importantly, it allows **malware and privacy risks** to make their way into an organization - causing breaches and distrust.

**Votiro solves this problem.**

## Data Security In Motion.

### Real-time Data Detection and Disarming/Masking

Votiro detects known and unknown threats in content attempting to enter your organization, then proactively disarms the file before it ever reaches the endpoint.

### Unified Threat and Privacy Analytics for Visibility

Votiro delivers in-depth, actionable insights as content flows in. This enables organizations to remain in control and make the best decisions for their business.

### Automated Remediation to Reduce Workloads

Automatic threat mitigation allows your team to spend less time quarantining and blocking files, while also reducing false positives. This equals less noise in the SOC.

## Try Votiro Free for 30 Days

See how Votiro stops threats before they ever reach your endpoint with a **free trial!**
