

VOTIRO

for Healthcare

Patient data is privileged.
We keep it that way.

Votiro Eliminates Malware and Privacy Risks to the Healthcare Industry.

Healthcare facilities and health insurance providers ingest countless documents from patients, third-parties, and other providers, including some of the most private information available - PHI, PII, and PCI. This makes healthcare facilities a prime target for attackers as teams transfer and receive information from multiple un-secure sources, like email, FTP, portal uploads, and more.

Votiro cleanses all incoming files of hidden threats before they reach the endpoint. This ensures that staff and vendors alike are opening safe content - never allowing threat actors and malware to breach sensitive areas.

Votiro Plugs the Gaps Left Behind by AV, DSPM, EDR, DLP, and **Prevents Zero-days**

Plus, **Votiro** protects more than **200 file types**.

Healthcare Data Security without Compromise

From patients to providers to specialists to insurance companies, **healthcare data flows everywhere**. This makes visibility and mitigation nearly impossible for IT teams to keep up with. More importantly, it allows **malware and privacy risks** to make their way into an organization - causing breaches and extreme distrust.

Votiro solves this problem.

Real-time Data Detection and Disarming/Masking

Votiro detects known and unknown threats in content attempting to enter your organization, then proactively disarms the file before it ever reaches the endpoint.

Unified Threat and Privacy Analytics for Visibility

Votiro delivers in-depth, actionable insights as content flows in. This enables organizations to remain compliant and make the best decisions for their business.

Automated Remediation to Reduce Workloads

Automatic threat mitigation allows your team to spend less time quarantining and blocking files, while also reducing false positives. This equals less noise in the SOC.

“Because of **Votiro**, we can safely allow downloads. I think about 70% of the files we wanted to download weren't allowed with our previous vendor. **Votiro** gave us the greatest flexibility in file downloading throughout our whole organization.”
— **ALYN Children's Hospital**
